THE BRILLIANT PRESENCE OF THE KITCHEN

Luxury Built-in Refrigerator BRR9000M Design Story
The meaning of a kitchen has evolved hand-in-hand with our everchanging lifestyles and has now become a place in which you invite guests over for a shared meal or enjoy a moment of peace with a cup of tea. We focused on a refrigerator that functions as a pivotal point of a kitchen which is exposed to anyone who enters the kitchen. We hereby introduce the BRR9000M, a refrigerator that utterly satisfies the increasing standards of our users’ tastes and sensibilities, while acting as the perfect host that inspires conversation and illuminates our lifestyles with luxurious style.

The space of a modern kitchen is no longer limited to cooking and dining.
High-end Design that Blends into Any Space

The BRR9000M features a stylish Column Type design and easily harmonizes with any spatial environment. It transcends the identity of a simple home appliance and establishes itself as an elegant objet that redefines the look and feel of a classy kitchen.
A Soft Glow of Elegance

With stainless steel material as its base, the color, texture, and finishing of the BR9000M have been meticulously refined to create a product that conveys high-class appeal. The new colors of the BR9000M are not just a simple color but a gradation in a sophisticated and understanding style. This is a result of the Venture Design, an infinite search for the perfect form. The handle is designed to seamlessly integrate with the refrigerator, seamlessly transitioning from the wall to the refrigerator, creating a beautiful and seamless integration with the refrigerator.

A Unique Presence that Permeates into Space

Stainless steel material as its base, the color, texture, and finishing of the BR9000M have been meticulously refined to create a product that conveys high-class appeal. The new colors of the BR9000M are not just a simple color but a gradation in a sophisticated and understanding style. This is a result of the Venture Design, an infinite search for the perfect form. The handle is designed to seamlessly integrate with the refrigerator, seamlessly transitioning from the wall to the refrigerator, creating a beautiful and seamless integration with the refrigerator.

Unwavering Credibility Felt in the Palm of Your Hands

The handle serves as both the beginning and end of a user’s encounter with a refrigerator. To ensure the handle matches the quality of the product, we designed the handle to seamlessly transition from the wall to the refrigerator, creating a seamless integration with the appliance. The key portion that maintains a sharp edge connected to the handle features a smooth, rounded edge transitioning from the wall to the refrigerator, creating a beautiful and seamless integration with the refrigerator. The handle is designed to seamlessly integrate with the refrigerator, seamlessly transitioning from the wall to the refrigerator, creating a beautiful and seamless integration with the refrigerator.
When gauging just by its outer appearance, the BRR9000M’s presence in a kitchen is silent, refined, and reserved. But on the flipside, you will discover an unfathomable depth of effort and profound consideration for users that have been put into the product for it to ascend as a state-of-the-art appliance. Once you open the BRR9000M, the kitchen instantly transforms into a space in which you can experience a sublime lifestyle defined by the highest standards.
We aimed to develop a refrigerator that offers diverse different ingredients, each containing unique characteristics, in a single package. The external design of the refrigerator is built with a stainless steel finish in various colors such as stainless steel, brushed, and glass.

The interior of the refrigerator is designed to be more effective when the refrigerator is turned on for longer periods, and it always keeps food at the perfect temperature. The shelf and the cover are made of stainless steel for easy cleaning and the bottom is applied for better ventilation. The door has a protective film that does not make it susceptible to scratches that occur when touched. The shelves are made of stainless steel to prevent water buildup and provide smooth movement for different ingredients. They are designed with a special moment in the everyday lives of our users.

The door is equipped with a double container that prevents a sudden change in temperature. It has an extra-thick stainless steel panel that is made of stainless steel. The door has a protective film on it to prevent scratches that occur when touched. The shelves are made of stainless steel to prevent water buildup and provide smooth movement for different ingredients. They are designed with a special moment in the everyday lives of our users.
